

CLOUD SECURITY RACE

Some countries are further ahead than others when it comes to protecting data in the cloud

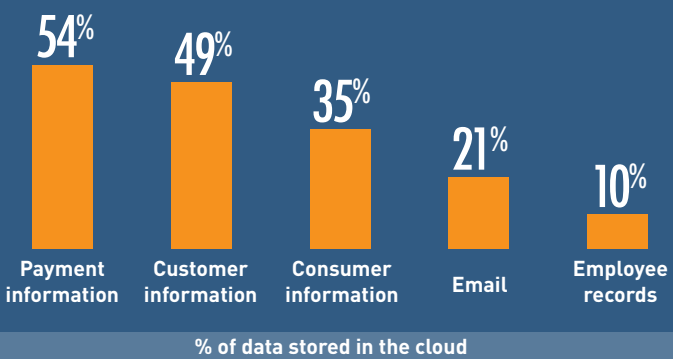

RACING TO THE CLOUD

In two years an average of **51%** of all IT and data processing requirements will be in the cloud, an increase from today's average of **39%**.

THE TYPE OF CORPORATE DATA STORED IN THE CLOUD IS ALSO THE DATA MOST AT RISK

Because of the sensitivity of the data and the need to comply with privacy and data protection regulations, companies worry most about payment information and customer information.

USE OF DATA SECURITY AND CLOUD ACCESS SECURITY MEASURES VARY

While **53%** of respondents say their organization uses multi-factor authentication to secure access to data in the cloud environment, only **36%** of respondents say their organization encrypts or tokenizes sensitive data within cloud applications.

WHICH COUNTRIES ARE WINNING THE CLOUD SECURITY RACE?

GERMANS MOST CAREFUL
Third party data sharing practices are most strict, according to respondents in German organizations.

GERMANY MOST COMPLIANT
German organizations are most proactive in managing compliance with regulations.

AUSTRALIA MOST UNCONFIDENT
Australian companies are most unsure about knowing what cloud computing applications, platform or infrastructure services are in use.

GERMAN SAFETY PREVAILS
Security policies are most likely to exist in Germany.
